## About Easan Electric

We are very glad to introduce ourselves as one of the reputed engineering organization manufacturing all kinds of electrical panel boards and actively doing all kinds of Electrification projects including supply of Transformer, Generators and their installation.

Our company is having a qualified and experienced team of Engineers, Supervisors and Technicians who are all able to handle the jobs right from conception to commissioning level with utmost quality and within stipulated time period.

The company is founded in 1998 by our Proprietor Sri S.N.Arunachalam who is in this field since 1988 and possess rich experience in electrical substation design & consultation, Manufacturing all kinds of electrical panel boards and providing electrification of all kinds.

## What We Do?

- ◆ Electrical Consultation and Contracting
- ◆ Electrical Turnkey Projects
- ◆ Fire & Safety Projects
- ◆ Sub Stations up to 110KV
- ◆ Supply, Installation, Testing and Commissioning of Electrical Switch boards
- ◆ Supply, Installation, Testing and Commissioning of DG sets
- ◆ Supply, Installation, Testing and Commissioning of Transformers, VCBs, RMG, C&R Panels and CSS
- ◆ Complete Internal Electrification
- ◆ Harmonic study and providing Solutions
- ◆ Power system study and analysis.
- ◆ AMC for electricals and Generating Sets
- ◆ Supply, Installation, Testing and Commissioning of Acoustic Enclosures
- ◆ Design and Installation of Room Acoustics.

## What We Manufacture?

- ◆ AMF - ATS panels
- ◆ Auto synchronizing with power management
- ◆ Grid synchronizing panels
- ◆ Grid-Solar-DG set integrated synchronizing panels
- ◆ LT distribution panels of all types
- ◆ MCCs, PCCs, MPCCs, PLC based panels
- ◆ Drive Control panels
- ◆ APFC Panels
- ◆ Control and Relay Panels
- ◆ Harmonic filtering panels
- ◆ Air insulated Bus ducts
- ◆ Air insulated Rising mains
- ◆ Custom built panels

## Type Test

- ◆ Type tested our panels for temperature rise and short circuit at CPRI, Bangalore.
- ◆ Test report no: SC09397A dt.06.08.2009 - For short circuit. Rated current 3200A. Tested for 50kA rms for 1.0 second and 105kA peak on phase bus bars.30kA rms for 1.0 second and 63kA peak on neutral bus bars.
- ◆ Test report no: DCCD-11063 dated 10.08.2009 -For temp rise. Rated current 2500A. Tested as per Cl.8.2.1 of IS 8623 Part-1-1993/IEC60439 Part -1 – 1985.

**EASAN ELECTRIC**

## Our Facility

- ◆ Full fledged design and drafting office with AutoCAD facilities to prepare the scheme, schedule of requirement, drawings, technical documentation, detailed engineering, etc...
- ◆ Testing equipment includes HV tester 5KV, Current injection tester, Meggar Tester
- ◆ In house Plant and Machinery, tools & tackles required to carry out the job
- ◆ Tools and Testing Equipment required for generator set over-haul

O U R F A C I L I T Y

Url: [www.easanelectric.com](http://www.easanelectric.com) | Email: [info@easanelectric.com](mailto:info@easanelectric.com)

## Our Merits

- ◆ We strictly follow the electrical standards, Application standards and we can take over any kind of electrical jobs.
- ◆ Coordinate efficient execution of installation, inspection, maintenance, and repair of power generation and electrical systems, including both interior and exterior electrical distribution
- ◆ Ensure subordinates perform their work in accordance with customer requirements meeting all applicable codes, maintenance manuals or other applicable documents
- ◆ Unique and creative solutions that meet the clients expectations
- ◆ Teamwork based on the implementation of progressive communications discipline professional quality of services provided by highly motivated team.

## Service Support

- ◆ We have team of engineers to take care of an effective after sale service of equipment supplied by us
- ◆ Dedicated team of engineers for electrical testing, commissioning and servicing
- ◆ Dedicated team of engineers for genset installation, testing, commissioning, maintenance, servicing, overhauls and AMC works

## Emergency/Standby Supplies

- ◆ We are Authorized Distributors for **KOHLER** Generators for sale and service of their Diesel Generators and accessories in Tamil Nadu (except Chennai City, Kancheepuram & Chengalpattu Districts). **KOHLER** has their Asia-Pacific Regional Plant in Singapore and now they have their Plant in India, at Aurangabad. This Plant is built with world-class semi-automated gen-set manufacturing and testing facilities to ensure quality products. The present range of DGs is from 5 to 3,000 KVA, which are available with acoustic enclosure, control panels & other standard accessories.
- ◆ We have supplied and commissioned quite a large number of these 'gen-sets' to various sectors of industries and render an effective after-sales-service to our clients by supplying genuine **KOHLER** spares and by undertaking Annual Maintenance Service.

## Our Clients

We have supplied our panels to several Industrial establishments in the country. Few of them are listed below

## Clients List with Work Details

Sl. No.	Clients	Work
1.	<b>M/S.LS MILLS LTD, THENI Unit A</b>	<p>SITC of 10 x 360KVA DDC DG set auto synchronizing panel, Distribution boards, Sub distribution boards, Fuse Distribution Boards, Sub Panels, Lighting auto change over boards etc., and generators.</p> <p>SITC of 2.5MVA transformer, 1250A 22KV 1+3 VCB panels, PCC, 4000A Air Insulated Bus ducts, 1250KVAR detuned reactor panel, 400KVAR Detuned reactor panels, Sub Panels</p>
	<b>M/S.LS MILLS LTD, THENI Unit B</b>	<p>SITC of 10 x 360KVA DDC DG set auto synchronizing panel, Distribution boards, Sub distribution boards, Fuse Distribution Boards, Sub Panels etc., and generators.</p> <p>SITC of 1000KVA transformer single tier PCC with 5 x 360KVA DDC + 2 x 500KVA Volvo DG set auto synchronizing panel, 1600A TPN bus duct, Sub switch boards, Distribution boards, Sub Panels, Fuse Distribution boards, 400KVAR Detuned reactor panel, Control and relay panel etc. and generators.</p> <p>SITC of 1000KVA transformer double tier PCC, 1600A TPN bus duct, Sub switch boards, Distribution boards, Sub Panels, 400KVAR Detuned reactor panel etc.,</p> <p>SITC of 2000KVA transformer double tier PCC with 3 x 500KVA Volvo + 1x500KVA Perkins DG set AMF synchronizing panel, 3200A TPN bus duct, Sub switch boards, Distribution boards, 360 KVAR APFC panel, 22KV 1250A VCBs, Control and relay panels for VCBs, 22KV CTs, 550KVAR Detuned reactor panel etc. and generators.</p> <p>SITC of 1000KVA transformer PCC 550KVAR Detuned reactor panel, 100KVAR tuned reactor panels 1no, 50KVAR tuned reactor panels 13 nos.</p>
